

WOMENS
TP100

The TP100 series utilises our advanced tres-tex® waterproof and breathable fabric technologies to deliver performance at the highest level.

Radium: This seasons Radium is super stylish and extremely functional. It's a compact range with strong block colours and packed with special features.

Radium fabric incorporates our advanced membrane technology. This high performance fabric will shield you from the wind and snow by transporting moisture outwards, ensuring you are warm and dry throughout the day. The inner garment has been improved and updated again this year, and with an endless array of innovative features, you can relax and just enjoy your ride.

Stretch: The introduction of stretch polymers to this fabric provides great extension and recovery properties, offering the wearer improved freedom of movement, extra fit and comfort. Our tres-tex® coating which has a Durable Water Repellent finish keeps the rain out while allowing perspiration vapour to escape. Ideal for active and highly mobile pursuits.
