

MENS
TP75

Our intermediate TP75 series offers great value, delivering excellent functional performance and features coupled with contemporary styling. All feature our trusted tres-tex® waterproof and breathable technology.

Hedonic: The new Hedonic range offers a two tone wool like oxford fabric quality that performs at 8000mm Waterproof / 3000mvp Breathable. This season we have introduced different colours to the Hedonic range that will also mix with different qualities to create an individual look. As always Hedonic delivers sound technical benefits as well as keeping you dry, comfortable and bang on trend.

Elevate: Elevate's coated fabric keeps the elements out while helping to transfer moisture and condensation from the body to the outer layer of fabric. Combining style with sound technical properties - performance garments with attitude.

Magnum: This classic intermediate range combines technical properties with intelligent reflective features.

Edge: Edge fabric coating keeps the elements out while helping to transfer moisture and condensation from body to the outer layer of fabric. This combines with a robust outer shell offering comfort & protection for difficult conditions.

Icon: The Icon range offers great value, delivering excellent functional performance and features coupled with contemporary styling. The Microfibre fabric, which has a subtle all over print, features our tres-tex waterproof and breathable technology.

Allta: Allta is a compact ski range ideal for snowy and windy weather conditions featuring taped critical seams and tres-tex® waterproof and breathable fabric. Allta's coated fabric keeps the elements out while helping to transfer moisture and condensation from the body to the outer layer of fabric.
