

MENS

TP75

Our intermediate TP75 series offers great value, delivering excellent functional performance and features coupled with contemporary styling. All feature our trusted tres-tex® waterproof and breathable technology.

Hedonic: The Hedonic range has a variety of fabrics that perform at 5000mm Waterproof / 5000mvp Breathable and 5000mm Waterproof / 3000mvp Breathable. This season, many of the individual pieces can be paired up, mixing the different fabric qualities together to create an individual look. These performance fabrics are deliberately different, but designed to work together: checks, denim look, herringbone and a soft woven quality. As always, Hedonic delivers sound technical benefits as well as keeping you dry, comfortable and bang on trend.

Elevate: Elevate's coated fabric keeps the elements out while helping to transfer moisture and condensation from the body to the outer layer of fabric. Combining style with sound technical properties - performance garments with attitude.

Magnum: This classic intermediate range combines technical properties with intelligent reflective features.

Edge: Edge fabric coating keeps the elements out while helping to transfer moisture and condensation from body to the outer layer of fabric. This combines with a robust outer shell offering comfort & protection for difficult conditions.

Quartz: Quartz's coated fabric keeps the elements out while helping to transfer moisture and condensation from body to the outer layer of fabric. These technical properties coupled with classic and functional design make Quartz a winner for the snowsports enthusiast.

Storm: Featuring our trusted tres-tex® waterproof and breathable technology, Storm's coated fabric keeps the elements out while helping to transfer moisture and condensation from the body to the outer layer of fabric. A soft, yet durable, water/windproof fabric with taped seams that provides comfort in all snow and windy conditions.

Allta: Introduced this season, Allta is a compact ski range ideal for snowy and windy weather conditions featuring taped critical seams and tres-tex® waterproof and breathable fabric. Allta's coated fabric keeps the elements out while helping to transfer moisture and condensation from the body to the outer layer of fabric.
